Add any of these to supercharge your page:

- Urgency Section
- FAQ Section
- CTA Section
- Pricing Table
- Bonus Section

NICHE SPECIFIC DESIGN AND COPY

Tell ChatGPT your niche and the entire design and copy style adapts specifically for it.

(Examples: dentists, gyms, SaaS, AI tools, ecommerce, coaches, real estate, fitness, finance and more)

HOW TO USE IT:

Step 1

Go to chat.openai.com and open a brand new chat.

Step 2

Copy the entire Master Prompt #2 and paste it into the chat. Press send.

Step 3

ChatGPT will ask you 5 quick questions one at a time. Answer each one before moving to the next.

Step 4

After your 5 answers ChatGPT will ask about your business – just tell it the name of your product, what it does, and the main benefits. Or paste your own copy if you have it ready.

Step 5

ChatGPT will then offer you conversion boosters to add to your page. Choose as many as you want or type "none" to skip.

Step 6

ChatGPT will write your full copy and generate your complete premium HTML website automatically.

Step 7

Once your site is ready ChatGPT will ask if you want any modifications. Request any changes and it will rewrite the complete updated HTML for you instantly.

Step 8

Copy the final HTML code, paste it into any HTML file, and your site is live.

THE 5 QUESTIONS:

Question 1 – Which type of site or layout do you want

Question 2 – Which design style do you want

Question 3 – What niche or industry is this site for

Question 4 – What are your preferred colors

Question 5 – Write my copy or provide your own

COMMANDS TO REMEMBER:

- Answer each question one at a time
- Be specific with your niche in Question 3
- Type your preferred colors clearly in Question 4
- Type A to have your copy written for you
- Type B to paste your own copy – it will be used exactly as written, nothing changed, nothing added
- When offered conversion boosters type the letters of what you want or type "none" to skip
- After your site is generated tell ChatGPT any changes you want and it will rewrite the complete updated HTML instantly

YOUR HTML CODE:

Once your site is complete you will receive a full clean HTML file. Here is how to use it:

Option A – Save it as index.html and upload it to any web hosting platform such as Netlify or GitHub Pages.

Option B – Paste it into any website builder that accepts custom HTML code.

Option C – Send it to your developer to publish it for you.

TIPS FOR BEST RESULTS:

- Be specific about your niche in Question 3 – the more specific you are the more tailored your entire design and copy will be
- Be specific about your business in the copy questions – the more detail you give the better your copy will be
- Choose colors that match your brand for the most accurate results
- If you have your own copy ready paste it in – ChatGPT will use it exactly as written without changing a single word
- Always add at least one conversion booster – they make a real difference to how well your page converts
- Always request your real button link to be inserted before saving your final code
- Run this prompt multiple times with different designs and layouts to find the version that performs best

THAT IS IT.

5 questions. Premium design. Advanced layout.
Conversion boosters. Niche specific copy.
A complete stunning HTML site –
all built for you inside ChatGPT.
