

QUICK START GUIDE – MASTER PROMPT #1

EASY AI SITE FACTORY

WHAT IS THIS?

This is a Master Prompt for ChatGPT that builds you a complete, beautiful, professional website in minutes – full copy written for you and clean HTML code ready to publish.

No design skills needed. No coding skills needed. Just answer 4 quick questions and ChatGPT does everything for you.

WHAT YOU GET AT THE END:

- A complete one page website fully written and coded
- Professional copy tailored to your business
- Beautiful design using your chosen colors and style
- Clean HTML code you can publish anywhere instantly
- Option to request any modifications before your final site is delivered

HOW TO USE IT:

Step 1

Go to chat.openai.com and open a brand new chat.

Step 2

Copy the entire Master Prompt #1 and paste it into the chat. Press send.

Step 3

ChatGPT will ask you 4 quick questions one at a time. Answer each one before moving to the next.

Step 4

After your 4 answers ChatGPT will ask about your business – just tell it the name of your product, what it does, and the main benefits. Or paste your own copy if you have it ready.

Step 5

ChatGPT will write your full copy and then generate your complete HTML website automatically.

Step 6

Once your site is ready ChatGPT will ask if you want any modifications. Request any changes you want and it will rewrite the full updated HTML for you instantly.

Step 7

Copy the final HTML code, paste it into any HTML file, and your site is live.

THE 3 SITE TYPES:

Landing Page

Perfect for capturing leads and growing your email list. Includes headline, subheadline, optin section, button, testimonials, and footer.

Sales Page

Perfect for selling a product or service. Includes headline, subheadline, bullet points, buy buttons, problem, solution, desire, testimonials, money back guarantee, and footer.

Personal Branding Page

Perfect for showcasing who you are and what you do. Includes headline, subheadline, about section, testimonials, 5 star ratings, button, and footer.

THE 5 STYLES YOU CAN CHOOSE FROM:

- Modern Business Style
- Minimal Creator Style
- Simple Sales Page Style
- SaaS Startup Style
- Ecommerce Product Style

COMMANDS TO REMEMBER:

- Answer each question one at a time
- Type your preferred colors clearly in Question 3
- Type A to have your copy written for you
- Type B to paste your own copy

– After your site is generated tell ChatGPT any changes you want and it will rewrite the complete updated HTML instantly

YOUR HTML CODE:

Once your site is complete you will receive a full clean HTML file. Here is how to use it:

Option A – Save it as index.html and upload it to any web hosting platform such as Netlify or GitHub Pages.

Option B – Paste it into any website builder that accepts custom HTML code.

Option C – Send it to your developer to publish it for you.

TIPS FOR BEST RESULTS:

– Be specific about your business when answering the copy questions – the more detail you give the better your copy will be

– Choose colors that match your brand for the most accurate results

– If you have your own copy ready paste it in – ChatGPT will use it exactly as written without changing a single word

– Always request your real button link to be inserted before saving your final code

– Run this prompt multiple times to create different page variations and test which one converts best

THAT IS IT.

4 questions. Full copy. Beautiful HTML site – all built for you inside ChatGPT.
